MACHINE VISION

CMMS for Maintenance Excellence

Control every maintenance activity end-to-end

MACHINE VISION

Computerized Maintenance Management System (CMMS)

In industrial environments, unplanned downtime is costly, reactive maintenance is risky, and manual tracking often creates operational blind spots.

Our **CMMS (Computerized Maintenance Management System)** is a web-based solution that helps teams in factories and industrial plants plan, schedule, execute, and monitor maintenance activities within one centralized platform in real time.

Because every factory is different, **our CMMS is built to be flexible and configurable.** It can be set up to match existing workflows, equipment types, and team structures, while continuing to grow alongside your operations

MACHINE VISION

Computerized Maintenance Management System (CMMS)

- Lower Maintenance Cost
- Less Unplanned Downtime
- Proactive, Not Reactive
- Real-Time Visibility

MACHINE VISION

Common Maintenance Challenges in Industry

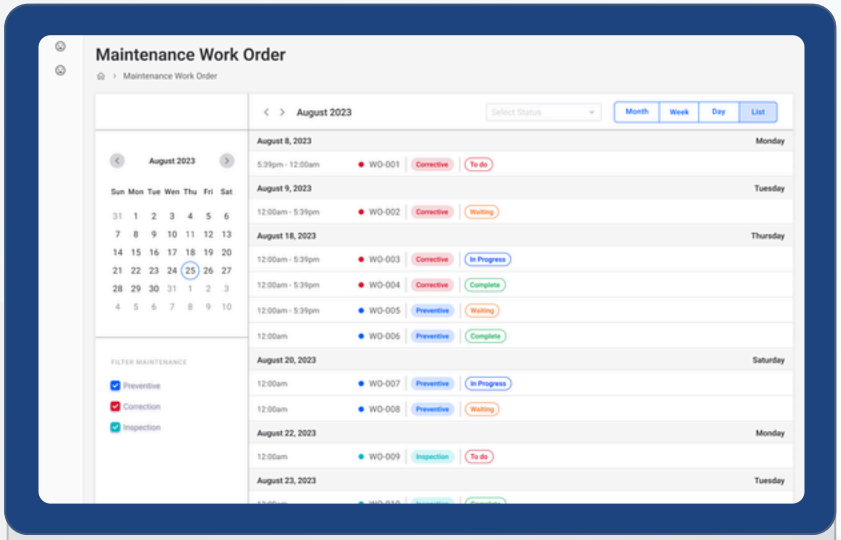

- Maintenance requests are spread across spreadsheets, paper forms, or chat messages
- Repairs are done only after machines break down
- Spare parts sometimes run out, or too many are stocked
- It's hard to see the full history of each machine
- There is no clear or consistent preventive maintenance schedule

Empower Your Maintenance

- Improve Equipment Uptime
- Reduce Unplanned Downtime
- Increase Team Productivity
- Control Maintenance Cost
- Real-Time Maintenance Visibility

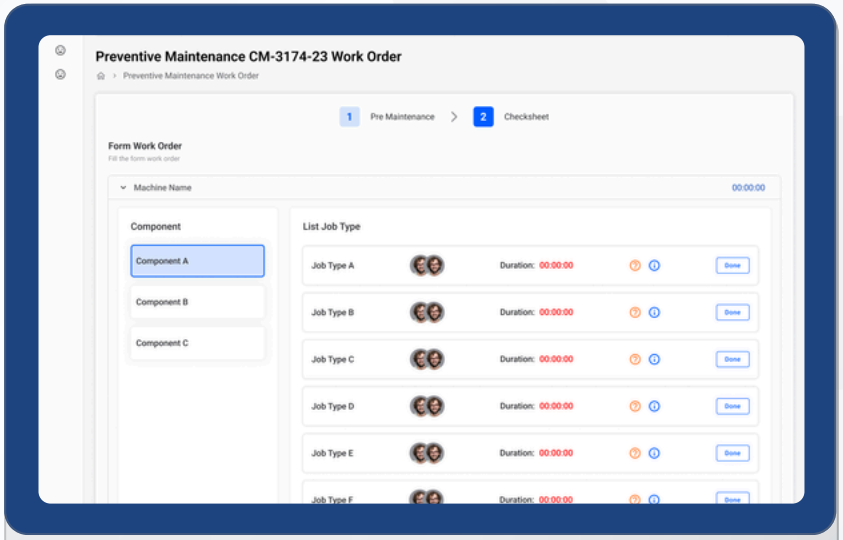

MACHINE VISION

KEY FEATURES

Work Order Management

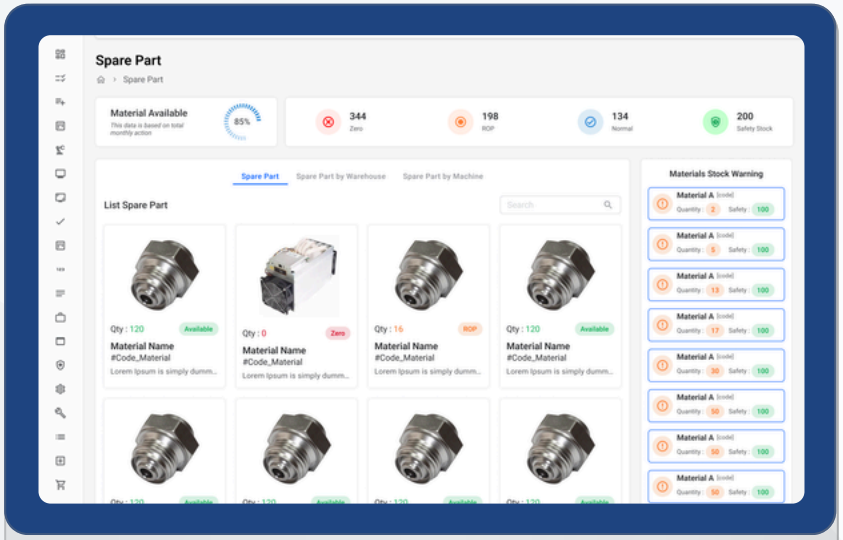

Create, assign, and track maintenance tasks in one organized system.

Preventive Maintenance

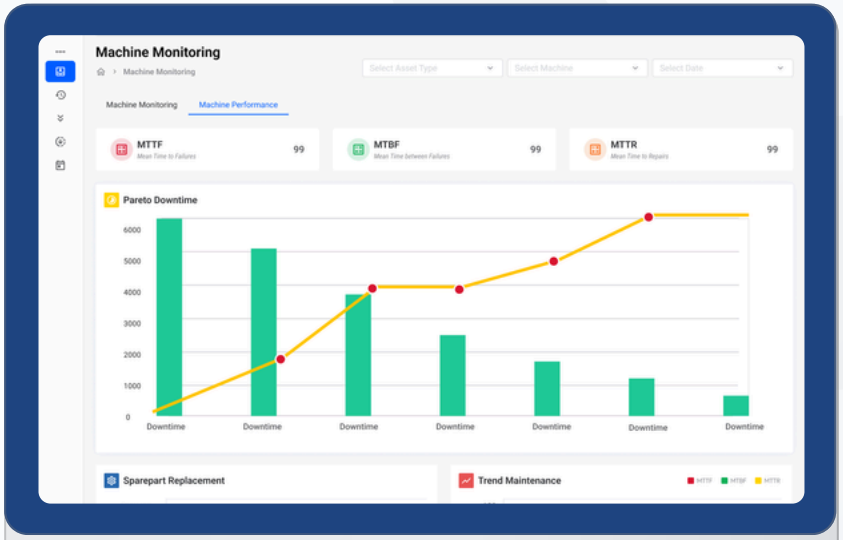

Schedule regular maintenance to prevent breakdowns and extend equipment life.

KEY FEATURES

Spare Part Inventory Management

Monitor spare part stock levels to avoid shortages and overstock.

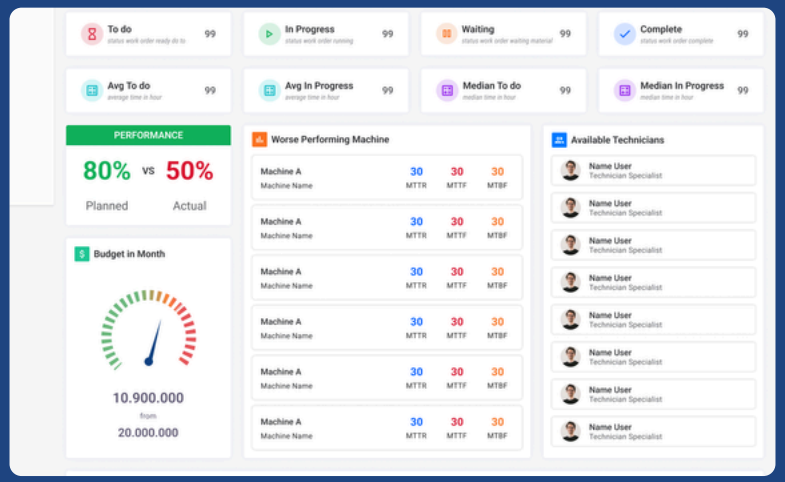

Downtime Control

Record and analyze machine downtime to reduce production interruptions.

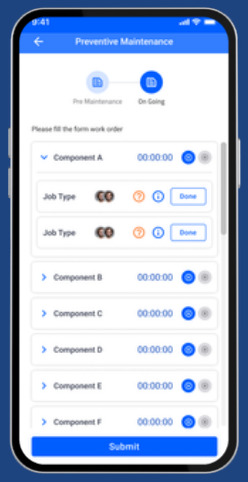

MACHINE VISION

KEY FEATURES

Report & Analytics

Get clear reports and insights to support better maintenance decisions.

Mobile Accessibility

Access and update maintenance tasks anytime, anywhere using mobile devices.

Flexible & Scalable Platform

Tailored to your operations and scalable for future expansion.

MACHINE VISION

We are a **Smart Manufacturing Transformation** company established in 2017 with a mission to accelerate digital transformation in the manufacturing sector. Our flagship product, the **MV Digitalization Platform**, is designed to seamlessly connect people, machines, systems, and devices — empowering factories with real-time visibility, actionable insights, and enhanced control across the production value chain.

We specialize in integrating three essential domains:

Lean Manufacturing
Reduce waste, improve efficiency

Information Technology
Scalable digital systems

Operational Technology
PLC, SCADA, sensors & protocols
